Introduction

The Letterhead Exchange and fellowship Program was conducted on 30 August 2026 as a symbol of friendship and collaboration between the Interact Club of Goldengate College, Battisputali, Kathmandu and the Interact Club of Central Lumbini, RI District 3292. The main purpose of this program was to connect the clubs through the exchange of official letterheads and to build a strong relationship for future collaboration

Although the clubs are situated in different parts of Nepal, they share a common purpose of developing young leaders, encouraging fellowship, and creating a positive impact in their communities. The exchange provided an opportunity for both clubs to strengthen their relationship and explore possibilities for future collaboration. Beyond the formal exchange, the fellowship allowed us to connect, share ideas and create memories together.

Project Summary

The program focused on building a lasting friendship and professional relationship between the Interact Club of Goldengate College and the Interact Club of Central Lumbini. Through the official letterhead exchange, both clubs expressed their willingness to connect, share experiences, learn from one another, and work together on meaningful initiatives in the future.

The program successfully strengthened communication and fellowship between the two clubs and opened the door for future joint projects and collaborations
